Response to Arguments

1. Applicant's arguments with respect to claims 1, 8-9, and 11 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 8, and 11, are rejected under 35 U.S.C. 102(e) as being anticipated by Glover.

Glover discloses a hard disk drive that shows all the limitations recited in claims 1, including the feature of the plurality of different bus interfaces that provide inputs from various sources in various formats and that provide to various outputs input in a plurality of formats (See Glover's column 5, lines 43-46, column 5, lines 65 to column 6, line 2, and further, see Glover's column 7, lines 9-11), the feature of storing the data through the disk processor on the hard disk drive under the control of the microprocessor powered by power supply (See Glover's Figure 1, components 26, 14, and 18).

With regard to claims 8, and 11, the feature of providing file management, bus arbitration, content management and stream management functions on the data to be stored on the local hard disk drive, so that any stored input stream can be selectively accessed on the hard disk drive as specified thereof is present in the cited reference of Glover. (See Glover's column 6, lines 10-25, claims 6, and 14).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Glover in view of Official Notice.

Glover discloses a hard disk drive apparatus that shows substantially the same limitations recited in claim 9, including the feature of receiving input data from input sources so that the data can be stored and accessed on the hard disk drive as specified in the present claim 9. (See Glover's Figure 1, components 14, and 20).

Glover fails to specifically disclose the feature of the input data being audio and video data and the capability of MPEG-2 encoding said data before storing the same on the hard disk drive as specified in the present claim 9.

Examiner takes Official Notice in that it is notoriously well known in the video recording/reproducing art to MPEG-2 encoding the inputted video/audio data before storing the same on a hard disk drive as specified in the present claim 9.

It would have been obvious to one skilled in the art to modify the Glover's hard disk drive system wherein the storing and inputting means provided thereof would incorporate the capability of MPEG-2 encoding inputted video/audio data before storing the same on a hard disk drive in the same conventional manner as is well known in the video/audio recording/reproducing art. Examiner has taken Official Notice. The motivation is to be able to store audio/video data on the hard disk drive at any desired time, and also, the motivation is to be able to increase the storing density of the hard disk drive, thereby increase the efficiency of the apparatus as suggested in the prior art.

6. Claims 2-7, and 10, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
